Products - Tape colours

Carbonio

Tape which allows, thanks to longitudinal carbon threads, the release of electrostatic energy once earthed. The threads are made of mixed carbon fibres and polyester.

3143

998

Manufactured tape with raw polyester threads. Not recommended for garment dye due to high temperatures, which could damage the synthetic or metallic parts of the zipper.

998

1000

Cotton tape, suitable for garment dye products. Dyeing tests on samples are necessary before starting production.

1000

Products - Tape colours

P5

Tape made with continuous threads obtained with an improved system to remove any fraying from the edge.

M2

Textile tape lightened in the construction of warp and weft created for knitwear.

Velvet

Tape made by spun of a particular polyamide, which takes a soft and delicate effect typical of the velvet tissue through a process of raising and cutting.

Satin

Tape made in shining polyester to obtain a visual impact and a touch sensation similar to silk.
